Our Schools

DEMO

We have run a program to help our students practice for the SSAT for about 20 years now.

Incorporating Test Innovators' technology into our program gave students **personalized learning tools** and allowed us to easily track individual and classroom progress...

...Their platform helped us **identify individual strengths and weaknesses** and spend our time helping each student feel **more confident.**

The Test Innovators staff have been professional and very helpful as we have made the transition to using their platform to enhance our SSAT course.

- Karl Koenigsbauer
Director of Secondary School Placement

Training Session (1hr)

LEARN

Our team will guide you through the ins and outs of our online test prep tools, providing a web-based overview of both the student and administrative views.

INTERPRET

Afterwards, you will have the opportunity to schedule another 30-minute session with our team to interpret the results and data.

REVIEW

Training is recorded and provided to you for future review as you get started using the platform.

To get you set up, we need...

GRADE

The grade for which your students will be applying

NAMES

First and last name of each student & staff member using the program

EMAILS

Email of each student and staff member for account set-up

Students

Full-length practice tests

Know what to expect on test day

Timing analysis

Build critical time management skills while practicing online or on paper

Benchmarking

Know what to aim for with integrated data from students' target schools

Personalized prep plan

See recommendations for next steps that target areas for improvement

Proven results

Students who use the TI platform score 70% higher than average

Educators

Progress tracking

See individual and class progress over time

Performance Analysis

Monitor and review performance of individual students and entire classes

Homework

Set deadlines and save time with auto-grading

Benchmarking

Know how your students compare to the national norm

Regulated practice

Guide students by releasing content over time

Pick the package that works best for your school
